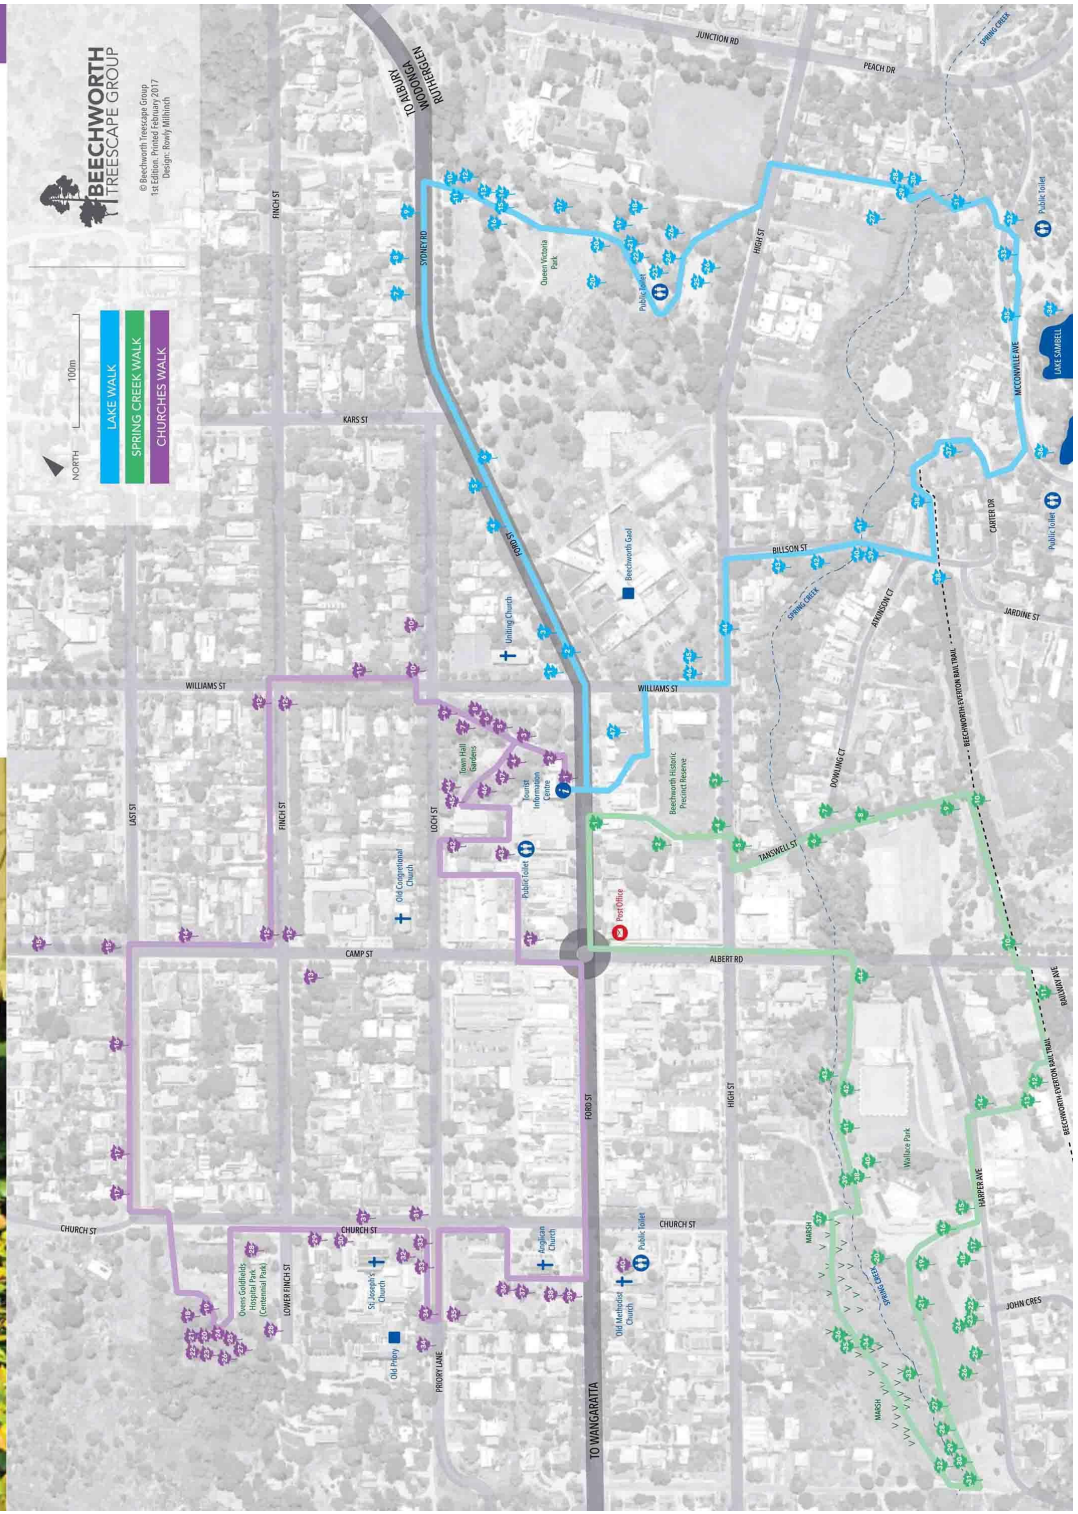
Walking Beechworth: town and gardens

The small township of Beechworth offers magnificent old avenues and a surprisingly large number of parks and gardens with plantings which began in the 1860's and continue to the present day. The Town Hall Gardens, Chinese Gardens, Queen Victoria Park, Wallace Park and the Ovens Goldfields Hospital Park contain many specimens of exotic trees protected by heritage regulations.

The three self-guided tree walks will lead you around the lanes and parks, past old churches and Victorian timber cottages, under avenues of elms and oaks, through a conifer arboretum, and alongside a lake and creek now replanted with native and exotic vegetation but originally part of the Beechworth gold fields.

Many trees will be listed on the Indigo Shire's Significant Tree Register as having exceptional historical, botanical or cultural value. Their place within the built environment reflects the importance of town planning in the Victorian era, with a community rich in gold and civic pride. The vistas change seasonally: majestic outlines in winter, leafy arbors in spring, shady meanders in summer and stunning autumn colours. Do return in another season!


Some trees are in private gardens. Please admire them from the footpath to respect the residents' privacy.
